Beyond Wealth

Verified data preview | October 2026 | project snapshot

2024 selected population: 2.397bn

13 countries in the selected, balanced 2000-2024 panel.

Population is summed once in the latest year; historical years are not added.

Health-efficiency is an exploratory index, not an official WHO metric.

This PDF is a source-backed preview of the corrected analysis.

Country detail

2024 population; ranked by population

Country	Population	Share of selected
India	1,450.9M	60.5%
United States	340.0M	14.2%
Japan	124.0M	5.2%
Egypt, Arab Rep.	116.5M	4.9%
Germany	83.5M	3.5%
United Kingdom	69.3M	2.9%
South Africa	64.0M	2.7%
Sudan	50.4M	2.1%
Morocco	38.1M	1.6%
Saudi Arabia	35.3M	1.5%
Jordan	11.6M	0.5%

Methodology and interpretation

Read alongside README.md and the semantic model measures

The selected-country population measure takes the latest visible year.

The panel has 13 countries and 25 annual observations per country.

Health efficiency is average life expectancy divided by ln(average GDP per capita).

That index has no causal interpretation and is sensitive to scaling.

Use year filters when comparing population and outcome measures.

See README.md for source and indicator definitions.
